

## Project Status report

Name: Mfonisoabasi Idorenyin James

Community (UN SD goal): Goal 4 Quality Education

MVP # 1

Sprint cycle dates: November 2<sup>nd</sup>, 2021

### Project Name

CURL

### Blurb

Section 4.4 of the UN Sustainable Development Goal: By 2030, substantially increase the number of youth and adults who have relevant skills, including technical and vocational skills, for employment, decent jobs and entrepreneurship. The development of this application is to connect free educational resources to children in a well structured and organized manner, to help make it easy for people to pick up new skills without being overwhelmed about where to start with the vast amount of content available on the internet.

### For Week Ending

November 2nd

### Project Status

Yellow

### Status Description

Provide an overview of the project's current status. If the status is yellow or red, indicate:

\* Overall the key points of the MVP for this milestone was achieved but the application overall thus far is lacking polish and more defined content.

\* The planned action to bring the project to a green status are as follows:

- fine-tune the apps design to make it more pleasing and appealing to the target audience
- add in course curriculum with good information breakdown on topics
- code refactoring

## Activities—During the past sprint cycle

List all activities that the team members worked on during the past week of the project. Show code and/or demo what you got

- four app page creations (Home Screen, Course list page and Specific Course page)
- button navigator to the different pages
- code refactoring among screen pages
- package build out and imports for attaching links
- embedded link attachment to free material achieved

## Project Issues

The biggest issue so far in the course of the project would be that the current package imported for embedding links does not seem to be working for higher android versions like Android 11 but it works with Android 8. A more stable and robust package will have to be sought out in the coming weeks.

## Project Changes

### Activities—Planned for Next Week

- fine-tune the apps design to make it more pleasing and appealing to the target audience
- add in course curriculum with good information breakdown on topics
- sourcing and importing a more robust link embedding package
- code refactoring

### Reflection

Do you feel "on track"?

- I do feel somewhat on track despite the minor discrepancies addressed earlier

What progress do you particularly feel good (great) about?

- getting the embed link to work was really challenging but I am particularly happy that I was able to figure it out

What barriers (if any) do you feel is/are a current impediment to success?

- my overall coding ability is not so strong so it means I constantly have to go back to the drawing board for a lot of concepts and time for learning as much as I would love to is not on my side

What help (if any) do you require to move positively forward?

- none so far at this stage but any feedback is always welcome and appreciated

What questions or concerns do you have (if any)?

- none at this stage
-
